-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2157

1. The amendment filed 6/21/2007 has been received and entered by the examiner.
2. Claims 4-9 are presenting for examination.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 4-9 are rejected under 35 U.S.C. 102(e) as being anticipate by Young et al (US Pat. 6,990,116).
5. As to claims 4-9, Young shows in Fig 1, A method for spoofing stations while transmitting data through a medium in an arrangement including a first station sends a Request-to-Send (R-T) message to an Access Point (AP) that includes a duration field, and a second station sends a Clear-to-Send (CTS) message that is responsive to the RTS message that also includes a duration, where the duration field defines a period of time that the medium is to be reserved to allow unimpeded transmission of data that the first station has to transmit, and where each an obeying station in the arrangement that receives either the RTS message or the CTS message, updates a Network Allocation Vector (NAV) with the duration information obtained from the received RTS message, or from the received CTS message when a corresponding RTS message was not received, characterized by:  
said NAV being updated by said receptions from other stations, including said and other AP and other Aps, and said first station employing the NAV to inhibit transmission by said station as long as the NAV indicates that the medium is in use, and permitting resumption of transmission when the NAV indicates other than that the medium is in use;  
said first station setting a duration value for its RTS message to a value other than a time period for a predetermined subsequent message transmission. See col 7, lines 9-25.
